

Portable Ozone Generator TROG-601

www.labdistributor.com | info@labdistributor.com

Description

Portable Ozone Generator TROG-601 is a convenient and portable device. It can work on different sterilization and purification treatments. It applies to using both air and water, with the working principle of the tube type-high voltage discharge gap. It can produce O₃ at a rate of 3 g/h. and is equipped with stainless steel. It has good performance and long service life.

Features:

It is having with good performance and long life

It is equipped with a stainless steel chamber

This applies to the use of air and water due to the operating principle of tube-type high voltage discharge paths

It has a lightweight and portable device

It can generate O₃ ranges

It is having with an ozone concentration

Intended with a high voltage ionization

It is both industry and household type

It is an automatic control time type device

It is having with a cool wind of Byo

Specifications :

Application	Both can use air and water
O3 range	3g/h
Overall size	500 ×160× 220 mm
Packing Size	550×220×270 mm
Power	220V/ 50HZ

Main Street Kansas City MO 64108, USA
