

Portable Ozone Generator TROG-603

www.labdistributor.com | info@labdistributor.com

Description

Portable Ozone Generator TROG-603 is a practical and portable device. It can be used for various sterilization and cleaning processes. This applies to the use of air and water due to the operating principle of tube-type high voltage discharge paths. It can generate O₃ at a rate of 7g / h. Moreover, it is equipped with stainless steel. It has good performance and long life.

Features:

It is having with good performance and long life

It is equipped with a stainless steel chamber

This applies to the use of air and water due to the operating principle of tube-type high voltage discharge paths

It has a lightweight and portable device

It can generate O₃ ranges

It is having with an ozone concentration

Intended with a high voltage ionization

It is both industry and household type

It is an automatic control time type device

It is having with a cool wind of 10m/s

Specifications :

Application	Both can use air and water
O3 range	7 g/h
Overall size	500 ×160× 220 mm
Packing Size	550×220×270 mm
Power	220V/ 50HZ

Main Street Kansas City MO 64108, USA
